

# Cyber Power Rankings

## United States

The Cyber Power Rankings were created by Cyber Skyline in partnership with the National Cyber League (NCL). Every year, over 10,000 students from more than 500 colleges & universities and 100 high schools across the US participate in the NCL competitions. These rankings represent the ability of students from these schools to perform real-world cybersecurity tasks on the Cyber Skyline platform. Students had to identify hackers from forensic data, pentest & audit vulnerable websites, recover from ransomware attacks, and more. Schools are ranked based on their top team performance, their top student's individual performance, and the aggregate individual performance of their students.
